

BLS EVERYDAY is a highly concentrated, neutral, odor-free, enzyme-based cleaning product that uses the natural cleaning action of enzymes to help dissolve the soils from the surface being cleaned. It is a multi-purpose cleaner, specifically formulated for the cleaning of all surfaces washable with water, particularly stains and odors that can occur on surfaces exposed to high humidity and insufficient airflow. It penetrates and lifts the contaminants from the surface. **If not wiped off, once they dry, the enzymes can/will be reactivated with water, allowing the product to continue working for weeks.** Rated with a Biodegradability Index of 10, BLS EVERYDAY is ecologically safe with active ingredients that are 100% biodegradable, proprietary, and non-hazardous to humans, animals, marine and plant life.

APPLICATION **Residential, Commercial, & Industrial applications.** BLS EVERYDAY is compatible with most commercial cleaning systems (pressurized, mechanical, manual) and with fresh or saline water. Optimal water temperature is 90° F (32° C), however, a range from 65-120° F or 18-49° C can be used effectively. Apply EVERYDAY to affected area and wash away stains with sponge, cloth, or brush. Repeat application periodically as needed. For severe stains, apply solution and let stand before scrubbing. Scrub discolored grout with a brush.

DILUTION BLS EVERYDAY concentrate dilutes 30:1 with water, or 4 ounces of concentrate with 1 gallon of water for a ready-to-use product. Dilute BLS EVERYDAY in a 32 oz. spray bottle to use for a variety of household uses, anywhere you may have mold, bacteria, or germs.

1 Quart of BLS EVERYDAY will make up to 7.5 Gallons of Ready-To-Use product.

Apply diluted BLS EVERYDAY to affected area and wash away stains with sponge, cloth, or brush. Allow surface to dry before applying a protectant. Repeat application periodically as needed. For severe stains, apply solution and let stand before scrubbing. Scrub discolored grout with a brush.

MANY USES Homes, apartments, kitchens, bathrooms, showers, basements, crawl spaces, attics, ducts, vents, roofs, patios, sidewalks, driveways, horse saddles, equipment, garages, decks, workshops, vinyl siding, laundry, and more - anywhere you may have mold, bacteria, or germs!

LAUNDRY Clothing, uniforms, work attire, athletic clothing, shoe soles/insoles - BLS EVERYDAY is great to use in your laundry, is safe to use in all machines, AND even gets rid of that yucky mildew smell in the machine! Using the cap on the BLS EVERYDAY bottle, fill one full-strength cap-full in place of laundry detergent for an all-natural clean. Safe to use in all machines, including high efficiency (HE). **Note:** Check in hidden area for colorfastness prior to laundry. Fabric should be laundered in cold or warm water only.

COMPATABILITY Concrete, Cinder Blocks, Bricks, Stone, Aluminum, Vinyl, Ceramic Tiles, Wood, Wallboard, Stucco, Plastic, Leather, Fabrics, Carpet, and any surface that is washable with water.

BENEFITS Penetrates and lifts hard to remove soils from all types of surfaces washable with water. **Note:** *Some severe stains may be permanent and irremovable, especially on certain porous surfaces.* Does not foster microbial strain resistance. Nonflammable – can be used safely near open flames and in limited ventilation areas. **It is easy and safe to use and recommended in the NORMI™ Sanitization Protocol.**

HANDLING Read the label and Material Safety Data Sheet for complete handling information before using this product.

- Store product in original, tightly closed container.
- BLS EVERYDAY has a 2-year shelf life.
